John Deere Corn & Wood Pellet Stoves Eligible for Tax Credit

Get up to a \$1,500 tax credit from the IRS when you purchase a John Deere Corn or Wood Pellet Stove.

The American Recovery and Reinvestment Act of 2009* provides a tax credit for products that meet the IRS guidelines of "Qualified Energy Property." The following John Deere corn and wood pellet stoves meet the IRS guidelines for this credit:

Model # HR-CS001 & HR-CS002 Corn Stoves
Model # HR-WPS01 & HR-WPS02 Wood Pellet Stoves

Details of guidelines:

- The tax credit is a 30% tax credit up to \$1,500 total amount over a two year period (2009 & 2010)
- Installation is covered as long as it is required for proper and safe operation of the stove.
- This credit applies only to existing principal residences. New homes and vacation homes do not qualify.
- Purchases made since January 1, 2009 are covered if the manufacturer offers a certification statement for the product.
- To receive credit, John Deere must provide you with a signed manufacturer's certificate that specifically states the two stove models listed above qualify for the "Qualified Energy Property" tax credit. Retain this certificate as part of your tax records along with exact records of purchase.
- This certificate is available to customers at www.deere.com/homeandworkshop.
- Contact your John Deere dealer for more information.

Consult your tax advisor or visit <http://www.hpba.org/government-affairs/issues-legislation> for further qualification details.

**The 30% tax credit (up to \$1,500) is not an instant rebate or product discount. It is a tax credit provided by the IRS as part of the 2009 American Recovery and Reinvestment Act and is applicable when filing personal income taxes for the 2009 and/or 2010 tax years. Please consult with a tax advisor or the Internal Revenue Code for more information.*
